SUMMARY

Motivated Full Stack Python Developer skilled in building responsive and efficient web applications. Strong knowledge of front-end and back-end development using Python, Django, React.js, HTML, CSS, and JavaScript. Experienced in API development, clean code practices, and database management. Passionate about creating user-friendly digital solutions.

SKILLS

- **Programming**: Python, JavaScript, HTML, CSS
- **Frameworks:** Django, React.js, Bootstrap
- **Databases:** MySQL, MongoDB, SQLite, PostgreSQL
- **APIs:** REST API, JSON
- **Tools:** Git, GitHub, VS Code
- **Soft Skills:** Problem Solving, Teamwork, Communication, Quick Learning

PROJECTS

Full-Stack E-Commerce Website – Django
- Built a full-stack e-commerce platform with user authentication, product management, cart, checkout, and order tracking modules.
- Designed scalable database models in MySQL and optimized queries, improving API response time by 30%.
- Implemented secure login/registration and admin access for product CRUD operations.
- Enabled dynamic product search, and responsive UI for seamless user experience across devices.
- Integrated order management system with updates.

Food Delivery Application – React.js
- Developed a responsive food delivery web app with menu browsing, cart operations, and order placement features.
- Implemented global state management using Context API, reducing component-level state complexity by 40%.
- Optimized UI rendering and reusable components to ensure fast, mobile-friendly performance across devices.
- Integrated dynamic filtering and category-based menu display to enhance user navigation and improve overall user experience.

EDUCATION

B.E – Electrical and Electronics Engineering, CGPA-8.07   2021 – 2025
Coimbatore Institute Of Engineering And Technology   Coimbatore

CERTIFICATES

- Full Stack Python Development – Appin Technology, Coimbatore (November 2025)
- Artificial Intelligence Fundamentals – IBM SkillsBuild (September 2025)
